5. Old Business.

No old business.

6. Receive a presentation from Jones PR on the Oklahoma Fair Miles Pilot Program.

House Bill 1712 signed into law in 2021, created the Oklahoma Road User Charge Program at ODOT and established the Oklahoma Road User Charge Task Force to study and report on transportation funding alternatives to address declining fuel taxes. A report of finding and recommendations on implementation of the Oklahoma Road User Charge Program shall be submitted to the Legislature by December 31, 2023.

Increasing fuel efficiency will decrease available fuel tax funds for Oklahoma's transportation infrastructure maintenance and innovation. Fair Miles seeks to explore alternative funding options to replace the state fuel tax. Pay-per-mile programs treat roads like utilities and only charge you for what you use. Pay-per-mile programs help eliminate inequitable pressure on populations within Oklahoma that pay a disproportionate amount of state fuel tax. Road conditions worsen if adequate funding isn't available for ongoing maintenance. As Oklahoma's projected decrease in fuel tax is realized, road conditions will be difficult to maintain. A pay-per-mile program will keep our roads and bridges safe and usable. www.fairmilesok.com. More than 19 states have completed studies and pilots.

Oklahoma's fuel tax is 20 cents per gallon for gas and diesel. Federal fuel tax, paid on top of the state's fuel tax is 18.4 cents per gallon for gas and 24.4 cents per gallon for diesel.

The Oklahoma Road User Fee Task Force has been meeting for several years to develop a program that will study a fair Road User Charge due to loss of tax revenue from more fuel-efficient vehicles, electric vehicles and change in driving patterns. The Pilot Program is asking citizens to volunteer to help find a solution for permanent funding for our roads and bridges by signing up and participating in the 2023 statewide pilot program (July 2023-December 2023). Through this program participants will have options to report their mileage, review a sample bill and receive a participant gift card.

7. Receive a presentation from Melissa Davis, Local Governments, ODOT on the Structurally Deficient municipal/county bridge grant program.

Through the latest federal transportation legislation, Infrastructure Investment and Jobs Act (IIJA) the Bridge Formula Program, funds were made available to every state to assist in improving bridge conditions as part of the transportation

infrastructure. This funding is available for improving not only highway bridges, but also city and county owned structures.

With intentionality, ODOT has made great strides in addressing Structurally Deficient (SD) bridges on the state highway system, moving Oklahoma from number 49 in the nation for worst highway bridges to number 7, however, there are still over 1700 SD bridges on the city and county system. In an effort to reduce the number of structurally deficient bridges in our state, ODOT is making funding available to address as many structurally deficient bridges as possible that funding will permit. As part of this funding, ODOT has established the SD City Bridge Program (off system) with the goal of providing financial assistance to replace or rehabilitate SD bridges on the municipal system. If you have an SD bridge(s) within your municipal limits and you are interested, please fill out the notice of interest at this link: <https://app.smart-sheet.com/b/form/abfd805554334da7ae773579e12e17e7> .

8. Discuss the meeting frequencies for the SORTPO Policy Board 2024 calendar and take appropriate action.

The SORTPO Technical Committee and SORTPO Policy Board are scheduled to meet monthly, excluding the months of July and December. Over the past 2 years there have been several times the meetings were canceled for lack of actionable items. With the cancelation of meetings and not meeting in July or December there are times when both the Technical Committee and Policy Board do not meet for 2-3 months.

Discuss and act on the following:

1. No change to the meeting frequencies
2. Meet bimonthly meetings. January, March, May, July, September, November
3. Meet quarterly.

Introduction

In April 2012, the Oklahoma Department of Transportation (ODOT) entered an agreement with Oklahoma Association of Regional Councils (OARC) to oversee development of the regional transportation planning process and the regional public participation process in the non-metropolitan areas of the state. Three Councils of governments were selected as pilot projects: SWODA, NODA and COEDD. The goals of the RTPO are to provide a regional forum for cooperative decision making about transportation issues and to serve as liaison between the local governments and the Oklahoma Department of Transportation (ODOT). The exposure of the RTPO program through OARC has allowed for an interest in collaborating planning among county commissions, mayors, circuit engineering districts, ODOT Division Engineers, city officials, business owners, and local citizens.

Beginning with Federal Fiscal Year (FFY) 2015 two additional rural COGs (ASCOG and Grand Gateway) were added to the program. In FFY 2016, through a collaborative effort involving SORTPO, ASCOG and ODOT a transportation planning pilot project comprising sixteen (16) counties was initiated representing two Councils of Governments SWODA and ASCOG. The SWODA Board of Trustees adopted Resolution 16-06 (Appendix A) amending the SORTPO region (Map 1).

The objective of the PWP is to ensure the transportation planning activities for SWODA/ASCOG region identifies transportation and related planning activities that will be undertaken by SORTPO during FFY 2023-2024. The PWP is developed by SWODA/ASCOG in collaboration with Oklahoma Department of Transportation (ODOT). The PWP is comprised of 6 major elements with specific deliverables, activities, and summary details about expected products.

Federal Requirements

Federal transportation legislation first established performance-based planning requirements for metropolitan planning organizations (MPOs) in 2012 with the Moving Ahead for Progress in the 21st Century Act (MAP-21), which was continued in 2015 with the Fixing America's Surface Transportation (FAST) Act and in 2021 with the IIJA.

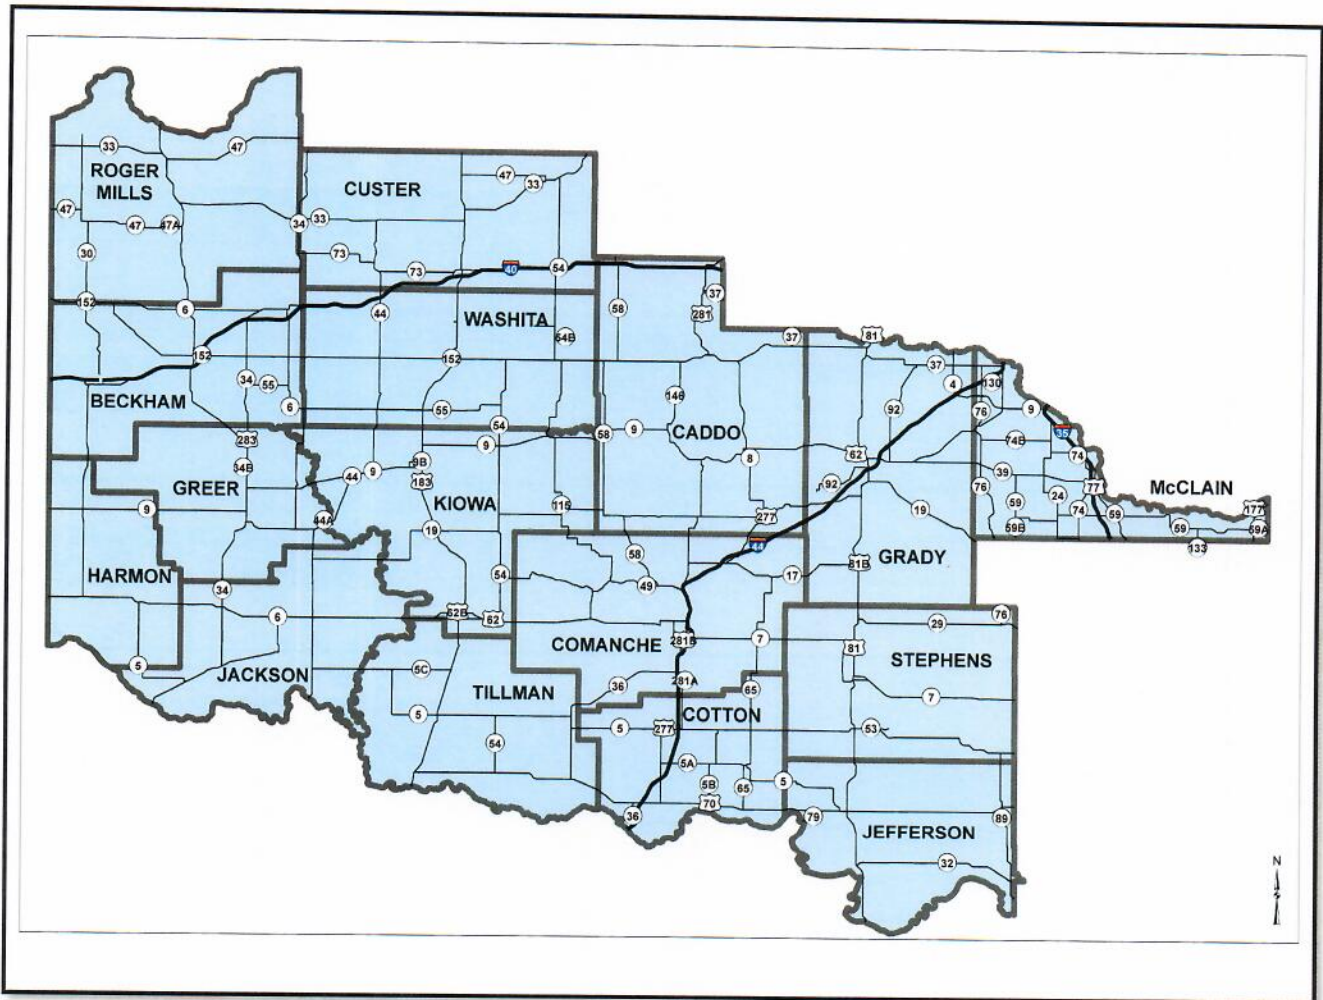

The requirement is for a streamlined and performance-based process for transportation planning, implementation, and evaluation that shows how these together will address national transportation goals. National goals for performance areas include:

- **Safety** – To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- **Infrastructure Condition** – To maintain the highway and transit system infrastructure assets in a state of good repair.
- **Congestion Reduction** – To achieve a significant reduction in congestion on the National Highway System.
- **System Reliability** – To improve the efficiency of the surface transportation system.
- **Freight Movement and Economic Vitality** – To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.

- **Environmental Sustainability** – To enhance the performance of the transportation system while protecting and enhancing the natural environment.
- **Reduced Project Delivery Delays** – To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies’ work practices.

Planning Factors

Planning Factors were established in MAP-21 and FAST Act as areas to consider when developing the transportation plan. The planning goals and strategies identified in the RTP address the 10 national planning factors:

- Support the economic vitality of the United States, the States, nonmetropolitan areas, and metropolitan areas, especially enabling global competitiveness, productivity, and efficiency.
- Improve infrastructure conditions to achieve a state of good repair.
- Reduce congestion.
- Increase accessibility and mobility of people and freight.

- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic patterns.
- Enhance the integration and connectivity of the transportation system across and between modes, people, and freight.
- Promote efficient system management and operation.
- Emphasize the preservation of the existing transportation system.
- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation.
- Enhance travel and tourism.

Transportation Planning Products

SORTPO's regional transportation planning process results in the development of planning products, including the PWP, data collection, Regional Transportation Plan (RTP), short range studies, Limited English Proficiency Plan and Public Participation Plan (PPP).

- *Planning Work Program (PWP)*. The PWP is one element of the transportation planning process that SWODA/ASCOG will follow in support of development of transportation planning products. The PWP documents the transportation planning activities and projects to be accomplished with SPR funds in SORTPO region during the federal fiscal year (FFY).
- *Regional Long-Range Transportation Plan (RTP)*. The RTP is one of the main products of the transportation planning process. Between 2015 and 2019 the SORTPO Transportation Policy Board adopted sixteen Long Range Transportation Plans. The development of the Regional Plan: Southwest Oklahoma Moving People and Goods began in 2020 and will be adopted in FFY 2024. SWODA is the recipient of a 2022 RAISE grant in the amount of \$1.5 million that will be utilized to further develop and enhance the regional plan under development.
- *Public Participation Plans (PPP)*. The intent of the Public Participation Plan is to encourage and support proactive public participation throughout the planning and decision making process related to the development of proposed transportation plans, programs, and projects so that a safe, efficient transportation system reflecting the needs and interests of all stakeholders can be provided. Public participation provides citizens, affected public agencies, private providers of transportation and other interested party's reasonable opportunity to comment, participate in goal setting, problem solving, and expand the focus of transportation decision making. In addition, the Fixing America's Surface Transportation Act (FAST Act) requires transportation agencies to develop and implement a proactive approach to ensure that transportation services are extended to those traditionally underserved. The SORTPO Policy Board amended the PPP by Resolution #2018-2 on June 28, 2018.
- *Limited English Proficiency Plan (LEP)*. SORTPO is represented by a diverse population residing in sixteen counties. SORTPO must prepare for and provide the opportunity for all its citizens to participate in the transportation planning process – regardless of their proficiency in speaking the English language – as required by Executive Order 13166 signed on August 11, 2000. SORTPO Policy adopted Resolution # 2018-3 on June 28, 2018, approving the LEP.

SORTPO Responsibilities

SORTPO responsibilities include:

- Develop and maintain a long-range multi modal Regional Transportation Plan (RTP).
- Coordinate transportation decisions among local jurisdictions, state agencies, and area transit operators.
- Develop an annual planning work program.
- Develop and implement a public participation plan (PPP).

All aspects of the planning process are overseen by the SORTPO Transportation Policy Board (TPB). The SORTPO Transportation Technical Committee (TTC) serves as the advisory group for transportation planning and policy initiatives. This committee reviews transportation planning work efforts and provides a recommendation to the TPB for their consideration and action. The day-to-day activities of SORTPO are supported by a full-time transportation planner. Additional SWODA and ASCOG staff members contribute to the transportation planning process to ensure the overall planning program is executed in a timely and efficient manner and in accordance with Federal regulations. Staff are housed within the SWODA and ASCOG Planning Departments. Staff, equipment, supplies, rent, consulting studies, and other expenses used to support staffing operations are reimbursable to SORTPO by the FHWA State Planning & Research (SPR) program funds at 80% of the total amount of the work effort and the local match of 20% is provided by SWODA and ASCOG.

Regional Transportation Priorities

The FFY 2024 SORTPO planning priorities are reflected in the various elements of this document. The major products or activities planned for FFY 2024 include:

- SORTPO will track rulemaking and other developments relating to the IIJ Act.
- Develop the Regional Transportation Improvement Program (RTIP).
- Monitor consultant(s) work and progress on development of the Regional Transportation Plan.
- Assess the progress of the Mobility Navigation program.
- Area planning assistance.
- Attending training recommended by ODOT to further enhance the skills of staff.
- Aid communities and agencies in the development of Transportation Alternative Program grants and other grants that enhance or support the transportation system.
- Advance public engagement and participation with the public to create contacts and relationships and share information pertaining to transportation planning in the region.
- Develop information explaining the SORTPO transportation planning process, key documents, update SORTPO website and attend meeting to present SORTPO transportation planning.

SFY 2023 Accomplishments

Reviewing FFY 2023, this section highlights some notable completed work items.

- FFY 2022 RAISE planning grant approved in the amount of \$1.5 million to develop a regional transportation plan.
- Developed request for proposal for FFY 2022 RAISE Planning Grant Consultant and evaluated proposals.

- Implemented Mobility Management Pilot Program for Jackson, Kiowa and Tillman counties.
- Hosted a Walkability Summit in Clinton, Ok.
- Completed the Regional Transportation Policy Plan.
- Submitted application to ODOT for official RTPO designation.
- Prepared and/or provided assistance in development of Transportation Alternative Program (TAP) grant applications.
- Awarded SPR Transportation Planning Mini grants.

PWP Funding

The SORTPO State Planning & Research (SPR) transportation planning program is funded by state, local funds, and in-kind matching funds totaling \$ 281,250. The largest funding source is derived from FHWA funds apportioned to ODOT's SPR program. FHWA funds cannot exceed 80% of the total PWP project cost. The remaining 20% is provided by SWODA, ASCOG and local jurisdictions/agencies. Total federal SPR funds for the transportation planning program applied for is \$225,000 and total Federal Transit Administration (FTA) 5310 funds available \$100,000. Funds shown in Table 1 summarize the budget by funding categories and source of funding. During FFY 2024, various SWODA staff will collect data that will support the SORTPO transportation planning process. The cost of this effort is allowable as a soft match for the grant. Table 2 identifies the funding by PWP work element for FFY 2024. Table 2 includes the funds administered by ODOT's Office of Mobility and Public Transit for the Mobility Management Pilot Program.

Indirect Costs

Regarding budgeting for work tasks, each task in the PWP corresponds to an adopted budget and associated indirect cost rate detailed in the "Estimated Budget Detail" worksheet. The Federal Office of Management and Budget defines indirect costs as "those costs that have been incurred for common or joint purposes that benefit more than one cost objective and cannot be readily identified with a particular objective without effort disproportionate to the results achieved." These costs are incurred by and originate in the agency conducting the federal award and remain after direct costs have been determined and assigned directly to federal awards and other activities. It is the ratio (expressed as a percentage) of the indirect costs to a direct cost base. This cost has been applied to all SORTPO PWP Elements.

The UPWP, Title VI and Environmental Justice

SORTPO recognizes that Environmental Justice must be considered in all phases of planning. Although Environmental Justice concerns are frequently raised during project development, Title VI applies equally to the plans, programs, and activities the SORTPO undertakes. The PWP integrates Environmental Justice considerations and Title VI requirements through the Public Participation Plan and PWP work tasks. Both the Public Participation Plan and Limited English Proficiency Plan contain strategies to reach minority and low-income groups. The SORTPO adopted Title VI discrimination complaint procedure.

The Public Participation Plan is an integral part of the regional transportation planning. The USDOT in (5610.2) on Environmental Justice specifies that minority populations and

low-income populations be provided with greater access to information on, and opportunities for public participation in transportation decision-making.

Tribal involvement

The native American tribes as well as the Southern Region Bureau of Indian Affairs are re provided notification of TPB, TTC meetings, public hearings, and information on the transportation planning process/program.

Federal public lands

During FFY 2024, representatives of federal land management agencies will be consulted as necessary when federal lands are likely to be impacted by elements contained in or proposed for inclusion in SORTPO’s regional long-range transportation plan.

1. **STANDARD OF CARE:** Chisholm Trail Consulting, LLC, its officers, directors, employees, agents, shareholders, partners, consultants, sub-consultants, contractors, and sub-contractors (collectively "CTC") shall provide professional services to Client, its officers, directors, employees, agents, owners, members, shareholders, partners, consultants, sub-consultants, contractors, and sub-contractors, (collectively "Client") according to the agreed upon scope of services. CTC shall exercise the same degree of care, skill, and diligence in the performance of the Services as is ordinarily possessed and exercised by a professional engineer under similar circumstances. CTC shall perform again any Services, which fail to satisfy this standard of care.

2. **USE OF DOCUMENTS:** Drawings, specifications, reports, programs, manuals, cost estimates, or other documents, including documents on electronic media, prepared under this Agreement are instruments of service and as such are only applicable to the subject PROJECT. Any reuse without prior written verification or adaptation by CTC for the specific purpose intended will be at Client's sole risk and without liability of legal exposure to CTC. Client shall defend, indemnify, and hold harmless CTC against all claims, losses, damages, injuries, and expenses, including attorneys' fees, arising out of or resulting from such reuse. Any verification or adaptation of documents will entitle CTC to additional compensation at rates to be agreed upon by Client and CTC.

3. **INSURANCE:** CTC and the Client agree to each maintain statutory Worker's Compensation, Employer's Liability Insurance, General Liability Insurance, and Automobile Insurance coverage for the duration of this agreement, as prescribed by law. Additionally, CTC will maintain Professional Liability Insurance for CTC's negligent acts, errors, or omissions in providing services pursuant to this Agreement. If the Client is a design professional, then the Client agrees to maintain Professional Liability Insurance for its negligent acts, errors, or omissions in providing services pursuant to this Agreement. If a project is Design-Build, the Client and all subcontractors providing professional design or other services (e.g., architects, engineers, and inspectors) shall maintain professional or similar liability insurance for claims arising from its negligent performance of said services. Proof of insurance shall be provided, upon request, prior to commencement of said services.

4. **NO WARRANTY:** CTC does not provide a warranty or guarantee, express or implied, for any portion of the scope of services including drawings, specifications, reports, programs, manuals, cost estimates, or other documents of service. CTC does not warrant or guarantee any certification of the project, including any level of LEED certification. Items of beneficial use to the Owner, whether or not included in the contract documents, shall be paid for by the Owner. The provisions of this paragraph shall apply notwithstanding any statement or language contained in any other document or agreement that might be related to the project.

5. **INDEMNIFICATION/HOLD HARMLESS:** CTC agrees, to the fullest extent permitted by law, to indemnify and hold harmless the Client and its employees from any liability, damages, or costs (including reasonable attorneys' fees and costs of defense) resulting from CTC's negligent acts, errors, or omissions through services provided pursuant to this Agreement by CTC or anyone for whom CTC is legally liable. The Client agrees, to the fullest extent permitted by law, to indemnify and hold harmless CTC, its employees and subconsultants from any liability, damages, or costs (including reasonable attorneys' fees and costs of defense) resulting from the negligent acts, errors, or omissions by Client or those contractors, subcontractors, consultants, or anyone for whom Client is legally liable, and arising from the project(s) that is the subject of this agreement. CTC is not obligated to indemnify the Client in any manner whatsoever for the Client's own negligence. If any liability, damages, or costs (including reasonable attorneys' fees and costs of defense) result from the concurrent negligence of CTC and the Client, this indemnification shall only apply to the extent of each party's proportion of the responsibility.

6. **DISPUTES:** Any action or claims arising out of or related to this Agreement or the project that is the subject of this Agreement shall be governed by Oklahoma law. Good faith negotiation and mediation are express conditions precedent to the filing of any legal action. Mediation shall be conducted in accordance with the latest edition of the Construction Mediation Rules of the American Arbitration Association.

7. **ASSIGNMENT OR SUBLETTING OF CONTRACT:** Client shall not assign, transfer, or sublet any rights, duties, or interests accruing from this Agreement without the prior written consent of CTC. This Agreement shall be binding upon the Client, its successors and assigns.

8. **NON PAYMENT/TERMINATION OF AGREEMENT:** If the Client fails to make payment for services and expenses within 30 days following receipt of an invoice, CTC may, after giving seven days written notice to the Client, without liability for delay charges, suspend services under this Agreement until CTC has been paid in full for all amounts due. Each party to this Agreement reserves the right to terminate the Agreement at any time, without cause, upon 15 days written notice and subject to payment to CTC for the value of services rendered up to the time of termination.

9. **DIFFERING SITE CONDITIONS:** The conditions at the site are the property of the Client/Owner regardless of whether or not they could be identified by an investigation or exploration conducted according to the professional standard of care. A "Differing Site Condition" is a subsurface, hidden, latent, or physical condition at a project site/building not revealed by the site exploration, site investigation, or other information provided to the Client and which cannot be reasonably anticipated. Special risks occur whenever engineering is applied to identifying site/building conditions. Even a comprehensive investigation according to the professional standard of care may not detect all subsurface or site/building conditions. CTC shall not be liable for site/building conditions which could not be identified by such an investigation or exploration. Accordingly, the Owner/Client agrees to indemnify, including all costs and attorney fees, and hold CTC harmless from all claims for Differing Site Conditions, provided CTC performs the services specified in the Contract in a manner reasonably conforming to the terms of the Contract and to the Standard of Care.

10. **EXTRA WORK:** Services not specified in the Scope of Services set forth in this Agreement or due to regulatory changes shall be considered "extra work". No "extra work" will be performed without additional compensation per a supplemental agreement.

11. **FORCE MAJEURE:** The Client shall not hold CTC responsible for damages or for delays in performance caused by force majeure, acts of God, or other acts or circumstances beyond the control of CTC, or that could not have been reasonably foreseen and prevented including, but not limited to, fire, weather, floods, earthquakes, epidemics, war, riots, terrorism, strikes, and unanticipated site conditions.

12. **AGREEMENT SOLELY FOR PARTIES' BENEFIT:** This agreement is solely for the benefit of CTC and Client. Nothing herein is intended in any way to benefit any third party or otherwise create any duty or obligation on behalf of CTC or Client in favor of such third parties.

13. **LIMITATION OF LIABILITY:** To the fullest extent permitted by law, CTC's total liability to Client is limited to the greater of \$50,000 or two times CTC's fee, for any and all damages or expenses arising out of this Agreement from any cause(s) or under any theory of liability. In no event shall CTC be liable for consequential damages, including, without limitation, loss of use or loss of profits, incurred by Client or its subsidiaries or successors, regardless of whether such damages are caused by breach of contract, willful misconduct, negligent act or omission, or other wrongful act of either of them.

Town of Bray Active Living Planning Project

The Town of Bray proposes to conduct planning to determine the feasibility of constructing various improvements to support Active Living in the community. It is believed that making various improvements in the area will promote a lifestyle that encourages physical activity in everyday life. These activities could include walking, jogging, bicycling and other forms of exercise. It is also intended to identify any needs to improve safety for vulnerable users moving within the community. Our hope is to encourage more participation in outdoor activities to be a more Active, Healthy Community.

Needs for connectivity between the various elements of our community will be identified, potential solutions will be evaluated, and a plan will be formulated to complete any needed improvements.

The Community Center is located in the heart of the community. This approximately 6,600 square foot facility houses Town Board meetings as well as a myriad of other community functions. A children's playground is located adjacent to the center. Immediately north of the Community Center are the Community Park which includes athletic fields, an RV park, and a pavilion. The Volunteer Fire Department is housed west of the Community Center. These facilities all comprise Town of Bray locations that will be included in the study area.

Bray-Doyle Schools lies immediately south of the Town of Bray. The school system educates and fosters the growth of more than 260 students from Pre-K through Senior High School levels. Bray-Doyle is active in many areas such as high school athletics, band, speech/drama, and other extra-curricular activities.

A locally popular commercial establishment known as the Bray Store lies on the north side of State Highway 29, which is also north of the Community Center. This business provides not only modern convenience store amenities, but also contains a diner and is very popular with people participating in activities at the Community Center and the schools.

Community involvement will be stressed and encouraged through social media and public meetings. Additional information used to aid in the planning effort will include data obtained from Bray-Doyle Schools Administration, the Oklahoma Department of Transportation (ODOT), U.S. Census Bureau, Oklahoma Department of Commerce, and the Association of South Central Governments (ASCOG).

Data will be collected and used to develop an understanding of the community support for this planning effort. Local Planning information such as any Comprehensive Land Use Plan, Transportation Plans, Parks and Recreation Master Plans, School Improvements Plans and Zoning will be considered. Demographics of potential users will be analyzed to aid in determining the types of uses most beneficial to the community. Funding opportunities will be identified to understand the level of commitment available for future design and construction.

This information will be used to guide development of a future Master Plan. These factors will impact the final locations and types of improvements to be made, what amenities to include in the improvements and whether the project will need to be completed in multiple phases.

The planning efforts will be carried out by our Consultant, Chisholm Trail Consulting, LLC. The Consultant will ensure that SORTPO is fully informed and involved in the Planning Effort. This phase of the planning effort will take an estimated nine months to complete at a cost of \$20,000.

Agenda Title: Discuss and approve consultant to develop the Regional Transportation Plan funded by the FFY 2022 RAISE grant.

Background: SWODA was awarded a \$1.5 million FFY 2022 Rebuilding American Infrastructure with Sustainability and Equity (RAISE) grant in August 2022. The selected consultant team will be responsible for:

1. Conducting a thorough analysis of the current transportation infrastructure, systems, and services in the region.
2. Engaging with stakeholders, including government agencies, local communities, transportation operators and the public to gather input.
3. Assessing future transportation needs and challenges, considering factors such as population trends, economic development, emerging technologies, and federal rules.
4. Developing a strategic vision, goals, and strategies for the Regional Transportation Plan.
5. Formulating data driven and evidence-based recommendations for improving the transportation system, ensuring efficiency, accessibility, and equity.
6. Outline a prioritized list of transportation projects, along with estimated costs, potential funding sources and responsible agency/entity.
7. Create short term and long-term actions, milestones, and performance measures.

The final agreement between USDOT and SWODA was executed on August 17, 2023. Staff distributed the Request for Proposal to ten firms with offices in Oklahoma; with a deadline submission date on September 11, 2023. Three proposals were submitted: Poe & Associates, Olsson and Kimley Horn. Interviews were conducted on September 25, 2023, at the ODOT office in Oklahoma City.
