 Posts on Social Media in Southwest Oklahoma!

My surgery to have my entire large intestine and football size Parastomal hernia repair is scheduled for tomorrow morning at 5:30am I have to be there. My approved me. Then they called and said they can't find a driver. Is there anyone that can help with a taxi fare? Or is on there way to Oklahoma City tomorrow morning around that time that can help me get to the hospital? Or that is going tonight that can give me and my daughter a ride? Even if it is earlier? This is a urgent major surgery:

Is anyone giving rides in ? Especially this weekend but in general too. I need them regularly and I have cash. Please feel free to private message me.

I see and hear others complain about there not being Uber or taxis. I am aware of Transportation. That is not what I need. I can't ride a bike for another month or so due to a neckbrace but this renders me mostly harmless if you were to give me a ride or rides. Thank you.

Is there a taxi service or something that runs on the weekends? does not and I really need to get to work.. hubby will have the car in Tulsa

# Transportation Safety

**What to keep in mind when finding transportation!**

## What Can You Do To Be SAFE?

- Don't accept rides from strangers...Find a public transit agency that follows FTA regulations for safe transport
- Call a MOBILITY NAVIGATOR or 211
- Plan ahead if possible, transit agencies can often make accommodations if they are given advance notice
- If they claim to be a local provider, verify the agency is legitimate by calling a mobility navigator or 211
- Have someone ride with you if possible when traveling by local providers

Don't include personal information or medical procedures on general social media platforms! Providing your address, the fact that you will be alone or you have cash, etc. is **DANGEROUS!**

Do you know the person who responded to your request? If not, this could be a **RED FLAG**
